

Maxon QCELL Carbon Gel Solar Battery Series Maxon Batteries

What is Maxon's qcell ultimate carbon gel?

The latest Maxon's QCELL Ultimate Carbon Gel series provides a superior cycle life to their AGM counterparts. The new robust thick plate design combined with the newest alloy carbon paste technology and the German-made Envonik Sio2 GEL is suited for many cycling applications.

What is a qcell carbon gel battery?

Thick EV plates & Carbon paste makes them ideal in Mobility, Golf Carts and Off-grid solar applications. The QCELL Carbon Gel battery comes with a private replacement warranty ranging from 1 year to 3 years by Maxon Batteries, an Australian family-owned business.

What types of batteries does Maxon offer?

Maxon's specialization encompasses a diverse range of battery types, including AGM, Hybrid AGM, Carbon Gel, Lead Carbon, and Lithium Iron Phosphate batteries, making it easy to find the perfect power source for your unique application needs.

What certifications do Maxon's batteries have?

Our Maxon's products are meticulously designed to meet the demands of Australian conditions and hold ISO9001, ISO14001, ISO45001, UL, CE, and UN3480 certifications. We deliver exceptionally high-quality batteries at competitive prices by working directly with the manufacturers.
