

What is Sungrow 1+x modular inverter?

Sungrow has launched its new-generation 1+X modular inverter to significantly innovate traditional inverters, which combines the advantages of both central and string inverters. It can be designed from 1.1MW to 8.8MW block size with modularized design, to provide extraordinary flexibility when designing PV power plants. 2.

How many MPPT can a 1+x inverter support?

The 1+X inverter can be configured up to 8.8MW with 1.1 MW modular capacity and one MPPT for each unit, which makes PV plant design unprecedentedly flexible and doubles the number of MPPT in the inverter when compared to mainstream central inverters.

Does a 1+x inverter support wireless communication?

Apart from the traditional hardwired RS485 communication method, the 1+X inverter can also provide the wireless communication function as an option. The 1+X inverter's wireless communication module supports a maximum of 50 combiner boxes, while the communication distance can reach up to 1000m.
