

Monrovia releases energy storage policy

Are California's battery energy storage systems going up?

For Immediate Release: October 24, 2023 SACRAMENTO -- New data show California is surging forward with the buildout of battery energy storage systems with more than 6,600 megawatts (MW) online, enough electricity to power 6.6 million homes for up to four hours.

What are the different types of energy storage policy?

Approximately 16 states have adopted some form of energy storage policy, which broadly fall into the following categories: procurement targets, regulatory adaptation, demonstration programs, financial incentives, and consumer protections. Below we give an overview of each of these energy storage policy categories.

How many MW of energy storage capacity is needed by 2045?

The state is projected to need 52,000 MW of energy storage capacity by 2045 to meet electricity demand. "Energy storage systems are a great example of how we can harness emerging technology to help create the equitable, reliable and affordable energy grid of the future," said CEC Vice Chair Siva Gunda.

Energy storage resources are becoming an increasingly important component of the energy mix as traditional fossil fuel baseload energy resources transition to renewable energy sources. There are currently 23 states, plus the District of Columbia and Puerto Rico, that have 100% clean energy goals in place. Storage can play a significant role in achieving these goals ...
