

# Muscat hydrogen energy storage project

How much is Oman's green hydrogen project worth?

Muscat: Hydrom, the Sultanate's green hydrogen orchestrator, announced signing two new green hydrogen projects in Dhofar worth US\$11 billion. The signings follow the successful completion of Hydrom's second round of auctions bringing the total hydrogen production in Oman to 1.38 million tonnes per year (mtpa) by 2030.

How much hydrogen does Oman produce a year?

The signings follow the successful completion of Hydrom's second round of auctions bringing the total hydrogen production in Oman to 1.38 million tonnes per year (mtpa) by 2030. Register to let us know your interest and to keep up with Hydrom updates. You can unsubscribe at any time.

What are Oman's hydrogen projects?

Oman's hydrogen projects will use electrolyzers powered by renewable electricity to extract hydrogen from desalinated sea water. Oman benefits from high-quality solar PV and onshore wind resources, as well as vast amounts of available land for large-scale projects.

Why is Oman launching a green hydrogen program?

The Sultanate of Oman has launched an ambitious green hydrogen program. Green hydrogen and its derivatives constitute a strategic opportunity for the country to ensure its energy security and diversify its economy while supporting the decarbonization efforts of hard-to-abate sectors both in Oman and around the world.

What is BP Oman doing with green hydrogen?

The second project was signed with BP Oman for the development of green hydrogen for ammonia production and export. The anticipated annual production for this project is 150 KTPA of green hydrogen from 3.5 GW of installed renewables capacity in Block Z1-03.

Is Oman a good place to produce green hydrogen?

Oman is blessed with very strong renewable resources, positioning it as one of the most attractive locations globally to produce green hydrogen competitively and at large-scale. Oman has, as such, set ambitious green hydrogen production targets, to cover both local demand as well as exports globally.

The project is intended for implementation in 2026. Another key project is underground mining for copper at Al-Ghizain in Wilayat of Al-Khaboura in Al-Batinah North Governorate, he said. The project aims to extract about 6.5 million tons of copper ore with a purity of 2 per cent over a period of 6 and a half years.

The depletion of reliable energy sources and the environmental and climatic repercussions of polluting energy sources have become global challenges. Hence, many countries have adopted various renewable energy
