

Nassau new energy storage project bidding

Is the Bahamas ready for a sustainable future?

The Prime Minister said the choice The Bahamas faces is stark. "Continue down a path of expensive, unreliable energy or pivot towards a future where energy is sustainable, affordable and secure." He noted that this Government administration's number one focus is reducing the cost of living for every Bahamian.

Does New Providence need a solar grid?

An interactive, two-way grid is required given any grid-connected distributed solar or renewable energy, however, he added. "Studies have shown that the New Providence grid (which serves Nassau) can take at least 8 megawatts (MW) of solar without worrying about storage.

How much energy does New Providence use?

New Providence's energy consumption totals around 260 MW, according to a local news report. "The MOU is the first step towards a desired long-term power generation pact between BPL and Shell and bringing strategic change to electricity generation and supply in New Providence," BPL's Moxey was quoted as saying.

Will BPL & shell build a new power plant in New Providence?

News broke this past November that BPL and Shell signed a Memorandum of Understanding (MoU) that entails Shell developing a 220-250-MW natural gas-fired power plant to serve the main island of New Providence that's tentatively slated for completion in the early 2020s, for example.
