

Neovolt-ESS-4 6kW Bytewatt

What is a neovolt inverter?

The Neovolt is a single-phase all-in-one system, combining battery and hybrid inverter. It's a 10.1kWh battery (9.6kWh usable capacity) based on Lithium Ferro Phosphate (LFP/LiFePO4) chemistry with the choice of two inverter capacities - 3.6kW (BW-INV-SPH3.6K) and 5kW (BW-INV-SPH5K).

Which neovolt battery should I buy?

Advertised at up to nearly a third cheaper than some equivalent capacity and better-known battery brands, the Bytewatt Neovolt (also branded as VoltX Neovolt Ecopulse in Australia) will be a tempting option for budget-conscious buyers. But the thing about batteries is - you really want good local support and warranty service.

Is voltX a neovolt?

In 2012, they added off-grid alternative energy product online sales. The VoltX brand was introduced in 2018 and VoltX Energy in 2022, marking its entry into the home battery system business. VoltX Energy is listed as an official Bytewatt partner and states it is the only Australian distributor of Neovolt.
