Microvast Energy recently announced the securing of a large contract to supply a utility-scale battery energy storage system to a US customer. The energy storage portion of the project is 1.2GWh and will be co-located with a solar plant. The energy storage containers will begin shipping in 2023, with commercial operation expected in 2024.

Both shows will be brought together under the new Energy Technology Live brand, providing a unique opportunity to discover the technology that's powering the energy transition. Launching in 2025, The Energy Storage Show will feature battery and energy storage systems for large-scale applications ranging from utility and grid scale systems ...
