

OPzS Battery Series 250 3500Ah Torch Energy

What are OPzS batteries?

The form factor known as OPzS batteries was created for traction systems. They are meant to be stacked and fastened together by their connections. Three primary types exist: PzS, PzB, and PzV. PzS stands for the Lead-Acid battery with the Standard DIN form factor. PzB is the less popular BS (British Standard) lead-acid battery form factor.

What is a powersafe OPzS battery?

The EnerSys® range of PowerSafe® OPzS batteries has been designed for use in all standby power applications that demand the highest levels of reliability and security. PowerSafe OPzS cells benefit from an optimised plate design that results in increased capacity compared to the requirements of the internationally recognised DIN standard.

Are OPzS batteries reliable?

OPzS batteries are among the longest-lasting lead batteries and are absolutely reliable energy suppliers with a long service life and the highest level of reliability, even for critical applications.

Why should you choose sunlight OPzS batteries?

Sunlight OPzS batteries are characterized by low maintenance requirements, long service life and excellent capacity performance while operating at high temperatures or unstable power network, thus providing a premium, efficient and cost effective energy solution.

What is sunlight OPzS?

Sunlight OPzS is a reliable backup power source, safeguarding the uninterrupted supply of energy and connectivity that our modern world needs. Learn more about this advanced lead-acid battery series for energy storage systems.

Are powersafe® OPzS batteries ISO 9001 certified?

Batteries must be installed in accordance with IEC 62485-2 and national/local regulations. The management systems governing the manufacture of PowerSafe® OPzS products are ISO 9001, ISO 14001 and ISO 45001 certified 2022 EnerSys. All rights reserved. Trademarks and logos are the property of EnerSys and its affiliates unless otherwise noted.
