

POLY 157 Daqo Group

Who is Daqo group?

Company profile for solar panel, Component and material manufacturer Daqo Group Co., Ltd. - showing the company's contact details and offerings.

Who is Daqo new energy?

Daqo New Energy Corp. is a Chinese company engaged in the manufacture of monocrystalline silicon (mono-Si) and polysilicon (poly-Si), primarily for use in solar photovoltaic systems. The company operates a mono-Si and poly-Si manufacturing facility located in Shihezi, Xinjiang Province, China.

Where is Daqo made?

The company operates a mono-Si and poly-Si manufacturing facility located in Shihezi, Xinjiang Province, China. Daqo formerly manufactured silicon wafers at a facility in Chongqing, China (discontinued in 2018) and photovoltaic modules at a facility in Nanjing, China (discontinued in 2012).

What percentage of Daqo's silicon is monocrystalline?

In Q1 2018, 60% of Daqo's production consisted of monocrystalline silicon and 40% consisted of polycrystalline silicon. Expansions 3B, 4A, and 4B will produce exclusively monocrystalline silicon. Daqo's Chongqing facility began production of silicon wafers in 2011.

Is Daqo a Xinjiang company?

Daqo New Energy Corp. was first listed on the New York Stock Exchange in October 2010, and Xinjiang Daqo was listed on China's New Third Board (China's OTC market) in 2016. Daqo produces its mono-Si and poly-Si using a chemical vapor deposition process in closed-loop reactors.

What is Daqo's production capacity?

As of 2018, an expansion (Phase 3B) is currently underway, which will bring the facility's annual production capacity to 30,000 MT. In Q1 2018, 60% of Daqo's production consisted of monocrystalline silicon and 40% consisted of polycrystalline silicon. Expansions 3B, 4A, and 4B will produce exclusively monocrystalline silicon.
