

PWM Charge Controller 30A Xantrex Technology

What is the Xantrex solar PWM charge controller 30?

The Xantrex Solar PWM Charge Controller 30 features a highly-efficient PWM charging mode, designed specifically for an aesthetically clean and integrated look in an RV, boat, and truck. Intuitive and easy-to-program to get your solar system harvesting energy as quickly as possible.

What is Xantrex solar MPPT charge controller 30?

The Xantrex Solar MPPT Charge Controller 30 features advanced Maximum Power Point Tracking (MPPT) technology, providing an instant upgrade to your solar system with up to 30% more power compared to PWM charge controllers.

What is a 30A PWM charge controller?

The 30A PWM Charge Controller is designed to be used in 12V or 24V off-grid solar systems. Its 30 AMP charge current, combined with a low voltage disconnect and high voltage warning, make the Charge Controller 30A PWM a smart choice for any system.

What is a PWM charge controller?

Designed to charge lithium ion batteries including LiFePO₄, the 30 A PWM (Pulse Width Modulation) charge controller features a flush mount industrial design for a clean finish.

What is a 30 a MPPT charge controller?

Maintenance free, renewable solutions to maximize battery life and prolong power supply. Designed to charge lithium ion batteries including LiFePO₄, the 30 A MPPT (Maximum Power Point Tracking) charge controller features an industry leading 98% charging efficiency and dual bank output to charge and maintain house and starter batteries.

The Xantrex Solar Charge Controllers are compatible with all types and makes of solar panels from all manufacturer's. Below is a list of available Xantrex Solar Panel Kits and Expansion Kits. Consider pairing this MPPT charge controller ...
