However the regulation of the DG 2813 was much more difficult than I expected and at some stage I even thought that the movement was defective because its accuracy would be unstable and nearly threw away the watch in the dead watches drawer.. Finally after much experimenting I managed to regulate it to about +2s per day.

8215's in a replica (and actually even the Seiko movements) is a new phenomenon. 2813 is a clone of 8215. This leads me to question whether or not shitter rep makers are really putting 8215 movements in there or if they're just labeling them that way or making a ...

DG 2813. DG 2813. Ranfft's page dedicated to this movement; This movement is not a clone of a Swiss movement.
