

Pile Driven Ground Mounting System

What is a de Pile ground mounting system?

Made of aluminum, the system is extremely low-maintenance during its entire life span and fully recyclable, aesthetically pleasing, ideal for quick installation. DE pile ground mounting system is a very economical solution for large commercial and utility scale installations, especially on uneven terrain.

How does the ironridge® ground mount system work?

The IronRidge® Ground Mount System combines our XR100® or XR1000® Rails with locally-sourced steel pipes or mechanical tubing, to create a cost-effective structure capable of handling any site or terrain challenge. Installation is simple with only a few structural components and no drilling, welding, or heavy machinery required.

What is a pole mount solar power station?

Pole mount is a very sturdy solution for small area solar photovoltaic needs. With its 15-45° angle settings, it can support installations in a wide range of locations. The small on-grid or off-grid power station can be arranged in garden, farmland, mountain, or beside water pump, telecom tower or the outdoor electrical house.

Do you need heavy equipment to install a ground mount?

You do not need to source expensive steel, pipe, or rent heavy machinery for the ground mount installation. Minimal geotechnical engineering required since there is no pile driving required. It is a simple one-piece design that is quick to manufacture, ship, stage and install.

What are the advantages of a Fastrack 510 ballasted ground mount system?

Advantages: The FastRack510 ballasted ground mount system does not require assembly, ground penetration, drilling, or pile driving. You do not need to source expensive steel, pipe, or rent heavy machinery for the ground mount installation. Minimal geotechnical engineering required since there is no pile driving required.

Does Fastrack 510 require a ground mount?

The FastRack510 ballasted ground mount system does not require assembly, ground penetration, drilling, or pile driving. You do not need to source expensive steel, pipe, or rent heavy machinery for the ground mount installation. Minimal geotechnical engineering required since there is no pile driving required.

Proper soil conditions must be present for driving piles. These conditions include good soil cohesion resulting in high pullout strength as well as limited refusal. A helical pile is a galvanized steel post with a split disc welded to the bottom at ...

The CHIKO Driven-pile Ground Mount, designed for servicing to large-scale solar farm (1-100MW), with its

Pile Driven Ground Mounting System

cost-effective and easy installation, without any compromise on design, quality, delivery or cost. It required no ground screw ...

In many cases, pile-driven foundations are impossible due to unsuitable soil - so we developed PVMax3. As the substructure is fastened to pre-cast concrete foundations and the number of bolted connections is reduced, the PVMax3 - ...

Engineered for superior strength, stability, and efficiently, FS Duo is the system of choice for level terrain, and perfect for large, multi-row module arrangements in open spaces and agricultural areas. Pile-driven foundations with no ground ...

MAKE YOUR SELECTION - Ground mounting kit. Item Product Price Quantity; 4 panel kit (non-foundation pile driven system) £650.00-+ Add to cart : 6 panel kit (non-foundation pile driven system) £960.00-+ Add to cart : 8 panel kit (non ...
