

Pitched Roof Racking System Empery Solar

What is racking & mounting a solar PV system?

Racking and mounting can often be the most complicated portion of a solar PV system installation. The racking is the foundation of the system- it protects the modules, the roof and people over a lifetime that can exceed 25 years.

Can a solar racking system be installed on a flat roof?

On a flat roof, the solar racking system is installed so the solar array is aligned at an angle. In either case, the solar mounting system can be a part of initial construction of the building or be retrofitted to an existing roof. Installing a solar racking system on a flat roof allows the solar array to be angled for optimal energy production.
