This agreement represents DTEK's first substantial ...

The energy storage projects we encounter on the Polish market are of great diversity, ranging from battery storage facilities with relatively small total installed capacities, through contracts focusing on the joint development of specific technologies (hydrogen, ammonia) for commercial use, to large energy storage facilities within pumped ...

Qair is an independent European renewable energy company with a global presence and a track record as an industry pioneer. Driven by its end-to-end approach, the company continually explores new ways to harness the potential of natural resources across multiple technologies. ... the company continually explores new ways to harness the potential ...

The new rules incentivize energy storage by reducing the fee payable by owners and operators of energy storage assets for connecting to the grid. The new rules create an opportunity for Poland to create a broad energy storage industry, PSME's president said, from the development of technologies and products to the creation of jobs.

PGE Group's strategy contains a transition plan, a path to the decarbonisation of energy generation and the objective of becoming climate-neutral by 2050. We will achieve it by investing in low- and zero-carbon energy sources and grid infrastructure. We will spend over PLN 75 billion on investments by 2030.
