

Power Battery ESS Enerbond

What is enerbond battery?

Based on supercapacitor technology, making the battery projected cycle life up to 20 years. Benefiting from solid-state battery, it uses solid and polymer electrolyte. Our batteries get extreme safety performance. Some of Enerbond products can be used at 5C~20C rate, and they are the perfect options for fast charging-discharging requirements.

Who is LG Chem, the manufacturer of ESS batteries?

LG Chem, the manufacturer of ESS batteries, is recognized as the industry leader in Lithium-ion batteries with 23 years of experience in delivering products and solutions to customers in the global energy sector.

What is enerbond caprack?

Enerbond Caprack is a flexible module design of graphene & solid-state battery to meet customer's customized demand for large power. The system provides the capacity design from 14.4kWh to 150kWh, and the voltage from 400V to 800V, which is expandable by adding more core modules.

Enerbond I& C battery energy storage solution meets growing energy demands and driving the world towards a clean energy future. Enerbond provides a long life & high reliable battery solution to generate clean electricity for your own ...

We deliver our best ESS solutions in the areas/Millisecond level response speed of BESS controller, Multiple ESS control functionalities ... Enerbond I& C battery energy storage solution meets growing energy demands and driving the world ...
