

# RI-Energyflow-Midi String Grid-Tied PV Inverters Rayleigh Instruments

What is a ri-energyflow-MIDI series inverter?

PV voltage up to 600V The RI-ENERGYFLOW-MIDI Series forms part of an expanding family of inverters from Rayleigh Instruments. These inverters are an ideal choice for residential projects with higher power density. Wider input voltage ranges offer more flexible installation and are a perfect match for high-power PV panels.

What is the RI-energyflow-MIDI series?

The RI-ENERGYFLOW-MIDI Series forms part of an expanding family of inverters from Rayleigh Instruments. These inverters are an ideal choice for residential projects with higher power density. Wider input voltage ranges offer more flexible installation and are a perfect match for high-power PV panels. You have no items to compare.

How do I contact Rayleigh instruments?

Please record every detail related to the fault, so Rayleigh Instruments can analyse and solve the fault. Any operation of equipment during a fault is strictly forbidden, please contact Rayleigh Instruments as soon as possible. Telephone : +44 (0) 1245 428500 Email : sales@rayleigh.com 5.

How do I set up Rayleigh solar panels?

Telephone : +44 (0) 1245 428500 Email : sales@rayleigh.com 5.3 Programming Menu Menu Path: Setup &gt; Enter Password (Default 00000) &gt; SYS Setting: The energy generated by the solar panels will be used in Charge the following order: Feed the home loads; Charge the from battery and then, feed into the grid.

How many batteries can be connected to a Rayleigh system?

Page 27 Telephone : +44 (0) 1245 428500 Email : sales@rayleigh.com If you connect more than 2 battery modules to the system, only install the additional batteries 5-6 (third module) on the side of the system. You can connect up to 6 batteries (three modules), each 2 batteries are mounted on top of each other.

How do I install a Rayleigh swivel nut?

Screw the swivel nut onto the threaded sleeve. This seals the AC connector and provides strain relief for the AC cable. When doing so, hold the bush insert firmly by the locking cap. This ensures that the swivel nut can be screwed firmly onto the threaded sleeve. Page 25 Telephone : +44 (0) 1245 428500 Email : sales@rayleigh.com 3.
