

# RV-DSN Solar Lithium System ROVO Power

What kind of batteries do RV solar systems use?

(Every RV solar system is essentially an RV solar battery charger.) We installed a much larger battery bank, 8 Battle Born 12V 100Ah GC2 Lithium-ion batteries. Our first RV solar system was built with a Tesla Model S car battery at its heart.

Who specializes in RV solar & lithium batteries?

With a background in Electrical Engineering, Tom specializes in RV solar systems and lithium batteries. He made history as the first documented individual to use a Tesla battery module as an RV battery. Tom has personally assisted countless RVers with system installations and has educated thousands more through his videos and articles.

How do off-grid RV solar power systems work?

Lets take a look at each part to understand further how they work. At the heart of every off-grid RV solar power system is the battery, which stores the energy for nighttime and cloudy day use. (Every RV solar system is essentially an RV solar battery charger.)

Can a lithium battery run an RV?

Yet, while using solar energy as a source to run everything in your RV is one thing, having that power when you need it can be a different story. In simple terms, lithium batteries effectively store solar power from the sun and act as an energy buffer in an RV.

Does your RV use solar power?

Solar power technology is well advanced and available now to everyone. For more than half the year, we rely on power exclusively from our off-grid RV solar power system, and it runs everything just like we were plugged into the grid.

How quiet is an RV solar inverter?

The inverter is very quiet unless running a heavy load or charging. If it gets too hot it will back down its charge automatically. This Off-Grid RV Solar Power System is powering our RV life and travels using the latest technology in RV Solar Panels.

A great example is the evolution of lithium batteries for RV solar applications. Lithium batteries have several apparent advantages (we'll get into those), but the price has always been the hurdle. Lithium batteries cost more -- a lot more -- ...

Next up in our tour series on our new 2021 Newmar New Aire, we're giving you a full tour and behind the scenes of building our custom 48 volt solar and lithium battery system! This is an extreme RV solar and
