

Energy-Storage.news reported a while back on the completion of an expansion at continental France's largest battery energy storage system (BESS) project. BESS capacity at the TotalEnergies refinery site in Dunkirk, northern France, is now 61MW/61MWh over two phases, with the most recent 36MW/36MWh addition completed shortly before the end of ...

Reykjavik Energy and the Nordic Investment Bank have agreed on a green loan financing of energy and utility projects in the amount of US\$100 million. ... Scatec has reached financial close and has prepared for the start of construction for its battery energy storage project in South Africa.

The Waratah Super Battery project is being delivered as a priority transmission infrastructure project under the Electricity Infrastructure Investment Act 2020 (the Act), and is the first such project to be delivered under this Act. The project is expected to stimulate up to \$1 billion in private investment into new energy storage and associated network augmentations, generate ...

The Oneida Energy Storage Project is a 250MW/1,000 MWh advanced stage, stand-alone lithium-ion battery storage project, representing one of the largest clean energy storage projects in the world. It will deliver critical capacity and improved efficiency to Ontario's energy grid and will double the amount of energy storage resources on Ontario ...

With the entry into operation of the Contego battery energy storage project, FRV, Harmony Energy and Tesla Megapack are contributing to the decarbonisation of the UK energy grid in what is one of the most innovative initiatives of its kind in the country. In doing so, FRV takes a big step towards its goal of achieving an increasingly ...

Through the project, a new CO₂-optimised capture plant will be constructed resulting in 150,000 tonnes of CO₂ being mineralized. Carbfix and ON Power, subsidiaries of Reykjavik Energy, have received a grant of 3.9 million euros from the EU Innovation Fund for the Silverstone project.

Financial close has been reached for a 25MW / 100MWh battery energy storage system (BESS) project in Belgium which has also been successful in a grid capacity auction alongside gas-fired power plants. The battery system will be built in Ruien, East Flanders, co-developed through a joint venture (JV) between the European arm of Japanese ...
