This Home Assistant Integration is providing information from SENE.Home V2.x, SENE.Home V3 and SENE.Home V4 Systems.

What is Senec home Assistant integration?

This Home Assistant Integration is providing information from SENE.Home V2.x, SENE.Home V3 and SENE.Home V4 Systems. In addition and where possible functions are provided to control the system. Please note, that this integration is not official and not supported by the SENE development team. I am not affiliated with SENE in any way.

Does Senec home integration work only with V3 systems?

Since I own a SENE.Home V3 hybrid duo I can only test my adjustments in such a configuration. But this does not imply, that this Integration is working only with V3 systems. The Integration should work with multiple SENE.Home Systems based on local lala.cgi calls.

Does Senec V4 integrate with a LAN?

But this does not imply, that this Integration is working only with V3 systems. The Integration should work with multiple SENE.Home Systems based on local lala.cgi calls. Have that said - the SENE.Home V4 will not come with a build-in web server that can be polled from your LAN.
