Cerwin Vega SL12 3-Way Floor Speaker The SL-15 and SL-12 are the flag-ships of Cerwin-Vega! SL-Series. The SL-12 delivers a true 3-way sound experience and incredible realism using three drivers, each dedicated to the high-, mid- and low-frequencies.

What is the SL 120?

The SL 120 is a device featuring the SL Imaging Module, which enables image and video recording of all examinations. It comes with the SL cam 5.0, a fully integrated 5-megapixel camera, and the SL imaging software, which together deliver high-resolution images and videos for documentation, patient consultation, or presentations.

How does the sl120 work?

There is no mechanism on the SL120 to change the position of the belt or idler, therefore there is no wow or flutter or unwanted speed change. Also, unlike previous players, there is no reduction or transmission mechanism and as the motor rotates at an ultra low speed, wear of parts is reduced to an absolute minimum.
