

The SM Series uses Autoclave's Medium pressure connection. The coned-and-threaded connection features orifice sizes to match the high flow characteristics of this series. Note: SM Series replaces 20SC Series. 10SM and 20SM Series valves are furnished complete with connection components, unless otherwise specified. ...

The SM Series uses Autoclave's Medium pressure coned and threaded connection. 15SM Series valves are furnished complete with connection components, unless otherwise specified. Panel mounting drill size: 0.75" (19.05) All dimensions for reference only and subject to change.

Parker Autoclave's SM Series needle valves are a non-rotating rising stem design, with working pressures to 20,000 psi (1379 bar). Tubing sizes range from 1/4" to 1-1/2". The valve connections utilize the Parker Autoclave coned and threaded design. ... Medium Pressure, 20,000 PSI.

Strong® Carbon Series Medium Single Arm Articulating Mount | 24" - 55" Displays. The Carbon Series Single Arm Articulating Mount offers 19" of extension with a 100 lb. UL Listed weight capacity to ensure durability for any install. The TV plate comes standard with up to a 200 x 300 VESA pattern, but included adapter plates allow up to 400 x ...

Medium waste water pumps are designed for pumping waste water with solids, mud, raw water and fermented sewages. These motors are of dry type with F class insulation for reliable service and pumps are offered with different type of impellers such as semi open and enclosed impeller with dual mechanical seals ensure reliability and trouble-free service for long life.

The SM Series uses Parker Autoclave Engineers' Medium pressure connection. The coned-and-threaded connection features orifice sizes to match the high flow characteristics of this series. Note: SM Series replaces 20SC Series. Needle Valves Pressures to 20,000 psi (1379 bar) SM Series Medium Pressure Needle Valves - SM Series Medium Pressure

The SM series of stepper motors brings efficiency of motion to Aerotech's line of rotary motor products. With ample torque at high velocities, the SM series is a perfect stand-in for DC brushed or brushless rotary motors in nearly any medium-accuracy motion application. With multiple offerings in frame sizes from NEMA 17 to NEMA 34, the SM ...
