

What is a modern STB?

Modern STBs are equipped with built-in Wi-Fi capabilities, allowing users to stream online content and access popular streaming services. This enables viewers to enjoy a wide variety of entertainment options beyond traditional broadcasting channels. Another trend in the STB industry is the development of advanced remote control options.

What is STB in technology?

In summary, STB in technology refers to a device that decodes digital television signals, providing users with access to various channels and programs. It plays a crucial role in the delivery of cable and satellite TV services, ensuring high-quality viewing experiences for subscribers.

Who is STB?

STB has nearly 15 years of experience as an IT engineer and QE director, including the past 8 years at Evizi, where she balances her project responsibilities with overseeing operations in our Da Nang office. She has extensive experience working with clients in North America, EMEA, Latin America and Asia.
