

Does SMC have a redesigned SY series valve?

SMC has improved product performance and reliability with the redesigned SY series valve. The SY3000 and SY5000 have the same valve width as their predecessors, but the flow has been increased by up to 80%, allowing the valve size to be reduced. A built-in strainer in the pilot valve prevents trouble caused by foreign matter.

Does the SY series comply with EMC & Low Energy Directive?

The SY series complies with the EMC Directive and the Low Energy Directive based on approval by TÜV Rheinland, an EC Notified Body (EC authorization No. 0197). When ordering CE marking compliant products, add "Q" at the end of the standard part number.

Why should you choose a SY series valve manifold?

The SY series valve manifold is a good choice for safety applications due to its long lifetime of minimum 200 million cycles, which ensures high operational safety. Additionally, two sizes are possible on one valve manifold, saving an additional valve manifold. Decentralized use directly at the application also optimizes hose lengths (enclosure IP67).

What is SY configuration software?

The SY Configurator software has been developed for the creation of special products as the result of a manifold and its stations (Simple Specials). Configure your SY3000/5000 Mixed (Types 10, 11, 12). The SY Configurator software has been developed for the creation of special products as the result of a manifold and its stations (Simple Specials).

What accessories are included in the SY configuration software?

Enclosure: IP67. SY Accessories: Subplate for Single Unit, Blanking Plate, Individual SUP/EXH Spacer Assembly, Spacer with Residual Pressure Release, Interface Regulator. The SY Configurator software has been developed for the creation of special products as the result of a manifold and its stations (Simple Specials).

Does SY300 have a 's' specification?

Note 2) For AC, there is no "S" specification, since it is integrated with the rectifier. Note 1) "LN" and "MN" include 2 sockets. Note 2) "D" and "DO" are not available for SY300.
