

Safari UT 1300 Lion Energy

What is a safari UT 1300 Battery?

The Safari UT 1300 is the latest in Lithium battery technology. It replaces traditional deep cycle lead acid batteries with the safest Lithium - Iron Phosphate. It is a "plug and play" - simply remove the deep cycle lead acid battery from your RV or boat and replace it with this superior performing battery.

Does Safari UT 1300 work?

The Safari UT 1300 just works, day in and day out. The Safari UT 1300 comes with a limited lifetime warranty and is the last battery you'll probably ever need. Using Lithium Iron Phosphate technology, it can be drained and recharge over 3,500 times, years and years longer than Lead Acid batteries.

Is the Lion Energy UT 1300 a good battery?

The article recommends the Lion Energy UT 1300 as a budget-friendly, high-quality lithium battery option for various applications. It addresses past concerns about Lion Energy's battery ratings, noting that the UT 1300's specifications are accurate.

Can a safari UT 1300 recharge a lead acid battery?

For example, if you used a third of the energy, the DoD is 33%. If you used all the energy in the Safari UT 1300, the DoD would be 100%. Lead acid batteries are recommended to not go below 50% discharge. If it does, it can become damaged or "dead" and may not be able to recharge.

Does the Safari UT 1300 have a BMS?

The Safari UT 1300 has a top-line BMS. Lead Acid batteries do not have a BMS. The Lion Safari UT 1300 is part of Lion Energy's pride of products that creates clean, limitless, renewable energy sources to power your life. It's designed to be recharged through traditional AC power or renewable sources--the SUN.

How do you charge a safari UT 1300?

It can be charged from an AC battery charger source or by solar. Most people use it as a "plug and play" by just replacing their old lead acid batteries in the RV and Trailers. Whatever or however the lead acid was being charged, it will also charge the Safari UT 1300.
