

The Volkswagen Group is entering a new business segment with the Elli charging and energy brand and will develop, build and operate large-scale stationary storage systems together with partners along the value chain. In the future, Elli's industrial energy storage systems will be used to supply customers and for arbitrage transactions on the electricity market.

The Program aims to support feasibility and engineering studies and associated metering that can enable an investment decision in energy efficiency and renewable energy solutions for industrial processes, which will: deliver a transformational improvement in industrial energy efficiency as compared to business as usual energy use; and/or

Global Hydrogen Storage Tanks and Transportation Market. 12 &#183; The Global Hydrogen Storage Tanks and Transportation Market was valued at USD 199.86 million in 2023 and is anticipated to generate an estimated revenue of USD 7,441.17 million by 2032, with a ...

Ognen MARINA<sup>1</sup>, Divna PENCIC<sup>2</sup> URBAN TRANSFORMATIONS OF SKOPJE FRAGMENTED CITY - LEGACY OF HISTORY Abstract Process of spatial and urban planning intensified at the end of XIX and beginning of XX century as a result of modernization of the Ottoman Empire, emergence of new geo-political context within the region and influences of new concepts ...

This paper analyzed the abandoned industrial sites in Skopje, North Macedonia in order to explore the potential for AR of underused or abandoned buildings in order to help improve current practices that are not aligned with CE. From the analyzed data it can be concluded that the city of Skopje is undergoing a transformation of its industrial zones.

As the third decade of the 21 st century unfolds, the world finds itself at a critical juncture in the realm of energy [1].The growing urgency of climate change challenges, combined with the simultaneous need for energy security and economic stability, has sparked a heightened global conversation about the future of our energy sources.

The transformation of industrial space in Skopje is similar to the one in cities of Central and Eastern Europe, where it resulted from the processes of economic restructuring, deindustrialization, globalization and tertiarization of the economy. Nevertheless, specifics that derive from the transition process, the low level
