What is a HomeGrid stack battery?

The HomeGrid Stack'd Series battery is the ultimate storage solution for residential and small commercial projects.

What is a Stack D Battery?

The Stack'd Series features a Lego-like modular design, with each white battery module providing 4.8 kWh of storage capacity. Each Stack can support 2-8 modules, allowing for easy customization and future expandability. The modular design enables installation in under 30 minutes and eliminates the need for complex wiring between modules.

How many kWh can a stacked energy system handle?

The system's capacity ranges from 9.6 kWh to 38.4 kWh per Stack, with the ability to connect up to 15 units in parallel for a staggering total capacity of 576 kWh. The modular design allows for easy installation in under 30 minutes and provides the flexibility to expand the system as energy needs grow.

Are stack'd batteries UL 9540 certified?

The company achieved UL 9540 certification after going through rigorous testing for reliability and safety. The Stack'd Series LFP batteries are a modular platform that can be scaled in 4.8 kWh increments, from 9.6 kWh to 38.4 kWh. The company is vertically integrated, using its own Tier 1 prismatic cells in the composition of the battery.

How much power does a Stack D system produce?

The Stack'd Series boasts an impressive output of up to 14.4 kW continuous power and a surge capacity of up to 24 kW for 10 seconds. The system's capacity ranges from 9.6 kWh to 38.4 kWh per Stack, with the ability to connect up to 15 units in parallel for a staggering total capacity of 576 kWh.

What is a stack'd series high voltage BMS?

These innovative modules automatically maintain batteries at ideal operating temperatures, preserving capacity and function. The Stack'd Series High Voltage BMS allows pairing with HV inverters, offering an adjustable output of 260-400V. This unit provides the same benefits as the classic Stack'd Series battery but with higher output voltage.
