

Steel Carport Mounting System

Where are metal carports manufactured?

Metal carports at HCI Steel Buildings are manufactured locally in our plant in Arlington, WA.

What is a single carport structure?

Single carport structures are common in many households in the United States. This structure can span to 12W x 21L x 6Lh x 9 peak height and is safe and efficient for shielding a single car from harsh weather conditions like rain and snow. A single carport is easy and fast to build, and it can take relatively a single day to assemble a kit.

What is an enclosed metal carport?

An enclosed metal carport is a structure with metal frames and walls made of wood. If installed properly, it can be an additional space for your property and can even serve as a kid's play area. It can be cost-effective and can be decorated and painted to add fun elements to it.

What is a metal carport used for?

A metal carport, as shown in this example, is used as a stable for horses. This 18' x 20' rounded eave carport with 5' legs has a strong and solid metal roof. There are many ways to utilize a metal carport.
