

Tracer BP Series

What is a tracer BP series solar charge controller?

The Tracer BP series solar charge controller adopts the advanced Maximum Power Point Tracking (MPPT) charging methods, it enables the system charging and discharging management to obtain the most radical optimization.

What is tracer-BP series?

With RS485 communication port and IP68 waterproof design. This product is already in your quote request list. Tracer-BP series adopts advanced MPPT (Maximum Power Point Tracking) charging methods which will result in up to 30% charging efficiency increase compared with the PWM charge controllers.

What is the difference between Tracer BP and PWM charge controller?

Tracer-BP series adopts advanced MPPT (Maximum Power Point Tracking) charging methods which will result in up to 30% charging efficiency increase compared with the PWM charge controllers. The RS485 interface with standard MODBUS communication protocol and 5V, 150mA power supply makes it easy for the customer to expand the application.

What is tracer-BP Solar charge controller?

Tracer-BP series MPPT solar charge controller Overview Features Tracer-BP series adopts advanced MPPT (Maximum Power Point Tracking) charging methods which will result in up to 30% charging efficiency increase compared with the PWM charge controllers.

What is the load self-test function of tracer BP series solar charge controller?

Overview Load self-test function The Tracer BP series solar charge controller adopts the advanced Maximum Power Point Tracking (MPPT) charging methods, it enables the system charging and discharging mode. The load is ON when the controller power on 10s. After 10s it will restore to set working mode. Page 2 HUIZHOU EPEVER TECHNOLOGY CO., LTD.

Does tracer BP work with LED lights?

Tracer-BP can work with LED light, but the condition is that the LED lights must have a built-in LED driver. Be the first person to like this faq. Can it work with MT50? 2 people found this faq useful. Add A New FAQ Question ! Captcha: += Verify Human or Spambot ? View 3D Model That is really fascinating, You are an overly professional blogger.
