

# Trapezoidal Color Steel Mounting System

What is a light elevation on a trapezoidal sheet metal roof?

With our light elevation on trapezoidal metal sheet we increase the module efficiency compared to roof-parallel mounting with short profiles. With an 5° elevation angle this solution is particularly suitable for very flat trapezoidal sheet metal roofs. It also ensures a better self-cleaning effect and increases rear ventilation of the modules.

Are solar mounting systems on trapezoidal roofs a good investment?

Solar mounting systems on trapezoidal roofs represent a smart investment in renewable energy. They combine functionality, efficiency, and sustainability. As technology advances, these systems will become more integrated and efficient. The future is bright for solar energy on trapezoidal roofs, promising a cleaner, greener planet.

What is a 5° elevation angle for a sheet metal roof?

With an 5° elevation angle this solution is particularly suitable for very flat trapezoidal sheet metal roofs. It also ensures a better self-cleaning effect and increases rear ventilation of the modules. Clamping system with light elevation

With our light elevation on trapezoidal metal sheet we increase the module efficiency compared to roof-parallel mounting with short profiles. With an 5° elevation angle this solution is particularly suitable for very flat trapezoidal ...
