[Energy Storage Materials 36 (2021) 459 ...

Lead-free ceramics with high recoverable energy density ( $W_{rec}$ ) and energy storage efficiency ( $\eta$ ) are attractive for advanced pulsed power capacitors to enable greater miniaturization and integration this work, a series of perovskite structured  $(1-x)(Bi_{0.6}Ba_{0.4})(Fe_{0.6}Ti_{0.4})O_{3-x}Nd(Zn_{2/3}Nb_{1/3})O_3$  (BF-BT-NZN) ceramics with high energy ...

Abstract The development of two-dimensional (2D) high-performance electrode materials is the key to new advances in the fields of energy storage and conversion. As a novel family of 2D layered materials, MXenes possess distinct structural, electronic and chemical properties that enable vast application potential in many fields, including batteries, supercapacitor and ...

abstract = "Dielectric capacitors with ultrahigh power densities are fundamental energy storage components in electrical and electronic systems. However, a long-standing challenge is improving their energy densities. We report dielectrics with ultrahigh energy densities designed with polymorphic nanodomains.

In linear dielectric polymers (the electric polarization scales linearly with the electric field, such as polypropylene, PP), the electrical conduction loss is the predominant energy loss mechanism under elevated temperatures and high electric fields [14, 15] incorporating highly insulating inorganic nanoparticles into polymer dielectrics has been proved effective in the ...

Ming-Na Wen Mulan Liu Yifei Ming-Na Wen thinks Mulan can help "represent" the trans community. The 56-year-old star -- who voiced the title role in 1998 Disney animated classic and its 2004 sequel -- has opened up about the cultural impact of a character forced "to dress up as a boy";.
